Mike Mongeau

HEAD OF PRODUCT

THESIS

Every product instinct I have started in support — **11 years** of listening to people who were stuck. That empathy became the foundation: support into growth, safety into play, compliance into product. **19 years** building where trust and scale collide.

HOW I WORK

- → Product Strategy & Vision
- → Cross-Functional Leadership
- → AI + Human Intelligence Systems
- → Growth & Monetization Loops
- → Developer Experience (DX)
- → Compliance & Trust Infrastructure
- → Behavioral Analytics & Research
- → Storytelling & Narrative Design
- → Team Building & Mentorship
- → 0→1 and Scale-Stage Product

EDUCATION

Minnesota State University
Computer Information Systems
Hired by Microsoft before completion

EXPERIENCE

Head of Product — K-ID

Sep 2025 — Present

Leading product, design, and research to build the compliance infrastructure the internet is being forced to adopt — and making it good. Transforming an early-stage startup into an enterprise SaaS leader.

- Drove **5x account graph growth** and **doubled MRR in 3 months**, scaling the CDK to serve over **27M+ verified users**
- Shipped at-scale age verification for **Snap, Discord, Twitch, Hasbro, Konami, Scopely, and Supercell** — **8+ major platforms** live
- Led product strategy that won **TIME Best Inventions 2025** & **Fast Company Next Big Thing in Tech**; Meta announced adoption of AgeKey standards in Q4
- Transformed developer experience by treating integration-as-a-product — docs, golden paths, reference apps — reducing time to integrate and human support load

Principal Product Lead — Xbox Family

Aug 2022 — Jul 2025

Owned family product strategy across console, PC, and mobile — shaping how millions of families play, stay safe, and stay together on Xbox.

- Increased MAU by **+21% YoY** for Xbox Family app, achieving **4.2+ rating** by refining core user flows and improving reliability
- Boosted child account creation + parental consent by **+266%** and first-day sign-in by **+62%** via transformative end-to-end redesign
- Shaped **$32M+ ARR feature** via parent-approved subscriptions, aligning cross-org strategy across compliance, satisfaction, and growth
- Drove vision and execution for PM group across **3 engineering teams** using research, competitive analysis, and behavioral analytics
- Made safety feel like play, not restriction — aligning Legal, PR, Marketing, and Engineering to ship features families actually wanted to use

Senior Product Manager — Microsoft 365

Jun 2019 — Aug 2022

Turned support into a growth engine. Used AI + HI to maximize SMB productivity, retention, and revenue at Microsoft 365.

- Grew paid seats by **1.3M** leveraging AI-driven recommendations, boosting adoption by **+15%** in treatment vs. control
- Reframed support as growth — accelerating SMB product value realization, subscription retention, and satisfaction
- Designed a scalable customer insight system through deep codification of support cases, driving novel product insights and fixes
- Achieved **188.8 SSAT** (+3.1 YoY) and **96.3% CVR** (+0.9 YoY) — delivering Microsoft's highest-performing support program at scale
- Managed and mentored a **team of 7**, driving experimental initiatives in AI + HI powered customer experiences

Senior Program Manager — Windows

May 2017 — Jun 2019

Brought customer reality directly into Windows engineering — through support and retail on-site immersion programs.

- Launched org-wide customer immersion program — **90% of participants** discovered new insights, **81% drove changes**
- Grew program usage **+189% YoY** serving over **700 internal stakeholders** — from new hires to CVPs
- Developed NPS (**76**) and NSAT (**178**) frameworks using participant sentiment to refine strategy

Support → PM Roles — Microsoft

2006 — 2017

Eleven years on the frontline. Every product instinct started here.

- Grew from frontline support to PM across **four product lines** — Windows, Windows Phone, KIN, and SharePoint
- Reduced Windows support incidents by **58%** through customer insight work that drove direct OS and hardware improvements
- Won Hack SharePoint for identifying an exploitable vulnerability — pattern recognition into security impact

RECOGNITION

TIME Best Inventions 2025
Fast Company Next Big Thing
Key Talent Awards ×6
Special Stock Awards ×6
Great Performance ×3
Community Award
Gold Star Award
Frontier Award

FOUNDER PROJECTS

Squadly

BUILDING · 2026

A kid-first platform for safe community beyond IRL. Think "Discord for Kids."

- Created strategy and early prototype for a safe, age-appropriate LFG platform for young gamers
- Assembled a founding team across engineering, partnerships, and product strategy with advisors from top-tier tech
- Tackling a deep market gap — kids pushed out of or forced into adult spaces — turning an obvious need into something they actually deserve

NewsReactor

SOLD · 2006

Bootstrapped a niche content aggregation platform for Usenet communities.

- Built and monetized to **15,000+ monthly visits** and **5,000+ community users**
- Negotiated and completed a successful exit — first proof I could build, grow, and sell

IMPACT AT A GLANCE
